KEYWORDS: Entrepreneurship, Starting a small business, Early stage startups.

The mission of EIX is to provide the soundest advice to help entrepreneurs, investors, and their companies improve their success rates. One important source of advice is based on research: rigorous studies that analyze what truly works.

Over the past several years EIX has partnered with scholarly entrepreneurship journals where researchers publish high-quality research on entrepreneurship. These lengthy papers undergo a rigorous peer review process before publication. We take this original research and distill it into practical takeaways. We have formal partnerships with three journals: Strategic Entrepreneurship Journal, the Journal of Business Venturing, and Entrepreneurship Theory in Practice. Independently of these partnerships, many individual authors who’ve published their scholarly articles have collaborated with us to bring their insights to a wider audience.

Below are the 10 most-read research translations in EIX published since 2021.

Entrepreneurs Need an Agile Mindset and Agile Slack
(https://eiexchange.com/content/entrepreneurs-need-an-agile-mindset-and-agile-slack)
(Published Oct. 18, 2023)

By Yoel Asseraf, Ruppin Academic Center, Israel

Companies must view change as a strategic opportunity -- and set aside enough resources to seize those opportunities quickly.

Is a Recession a Good Time to Start a Business?
Published September 26, 2022

By Siri Terjesen, Norwegian School of Economics and Business Administration

Like Microsoft and Southwest Airlines, ventures started in recessionary times that survive may end up with strengths that give them advantages over other companies born in easier times.

Studying Entrepreneurship With Mixed Methods
For the best insights, researchers need to dive deeply into the numbers and analysis – but they also need to talk with everyday business owners.

Field of Dreams: Exploration of Entrepreneurial Possibilities

The nanotechnology field began with science fiction stories. Ideas for innovation often come from wispy dreams that somehow coalesce into experimentation, discovery, opportunity, and marketable products.

When Can Fintech Do the Most Good?

Many have predicted that mobile money and other fintech will replace traditional banks in impoverished countries. However, research showed that socially marginalized people need both.

Simple Rules Can Power Up Your Global Strategy

As Lego, Unilever, and Apple have shown, a simple but memorable strategy statement can create a common mindset, regardless of cultural and language differences.

What Matters More for Entrepreneurs: Book Smarts or Street Smarts?

In environments with high levels of uncertainty, research showed that emotionally intelligent people were far more likely to be successful.

Measuring Your Social Impact: What the Research Says

Businesses are adopting policies to improve the environment, social justice and other worthy causes. But how do we measure the results?

Startup Employees Take a Hit Financially

Copyright © 2024 Jon Eckhardt, Catherine Buday, Published by Entrepreneur & Innovation Exchange
Research suggests that, unfortunately, most startup employees earn less -- both at the time of hiring and in the long run -- than their peers at traditional firms.
